(54) SHEETED COSMETIC COMPOSITION

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a sheeted cosmetic composition applicable even to dry skin, easily washable after attached to the skin for a long time and giving extremely excellent feeling to the skin by using a new water-soluble tacky adhesive material having high adhesivity.

SOLUTION: This cosmetic composition is produced by laminating a water-soluble tacky adhesive sheet and a water-soluble protecting material. The water-soluble tacky adhesive sheer preferably contains a water-

soluble polymer (e.g. gelatin, dimethylaminoethyl acrylate or polyvinyl alcohol) and water. The sheet is preferably further incorporated with a functional pharmaceutical component selected from among humectant, skin-beautifying agent, ultraviolet absorber, slimming agent, blood flow accelerating agent, astringent, anti-inflammatory agent, agent for preventing and improving the formation of wrinkles, chilling agent, thermal agent and surfactant. The water-soluble protecting material is preferably a water-soluble film, nonwoven fabric, woven fabric, etc., made of gelatin, polyvinyl alcohol, pullulan, etc. The composition is preferably stored by packaging with a gas barrier packaging material.
